

Tropic Cascade™

Lomandra hystrix 'LHWP' (b)

STRAPPY LEAF PLANTS

A new weeping *Lomandra* with outstanding green foliage.

- A more compact form than the standard *hystrix*, Tropic Cascade™ *Lomandra* is well suited to tropical and sub tropical regions and ideal for rain gardens.
- Tropic Cascade™ *Lomandra* has large fragrant yellow male flowers that will not produce seed.
- Will handle periods of wet feet and is drought tolerant.
- Can handle periods of moderate frosts, has survived a period of down to -4° celcius.
- When planting make sure a reasonable amount of 8-9 month slow release fertiliser is used, especially in poor nutrient soils.

Description	Weeping <i>Lomandra hystrix</i>
Density	2-6 plants per m ² 1.5-3 per linear metre
Height & Width	60-80cm x 60-80cm (maintains smaller height when cut back every 3-4 years)
